ConfessNaBai!

Accounts:
Super Admin:
      Username: admin
      Password: secret
Limited User Sample Account:
      Username: macmac
      Password: secret

To make an ordinary account super admin, change in phpmyadmin, table accounts, account_type to 3

UPDATE accounts SET account_type='3' WHERE username='sample_username'

SESSIONS
-> accounts_id
-> username
-> profile_picture
-> account_type

-----limited users
-> can register user but no personal information
-> if logged in, user can post a confession
-> if not logged in, anonymous posting
-> users can comment a post, logged-in or not logged-in

-----admin
two types of admin:
-> group admin = has control of all the posts in a particular group.
-> super admin = has control of everything. add, edit, delete,
      suspend a user/group admin.

-> every confession has a category
-> people can view confessions by category
-> people can view latest confessions
-> people can view the confessions of the user he/she followed

-> users can create groups. just like USC Confessions, UC Confessions.
-> there should be a GLOBAL group. tanan post kay makita ani, example kay:
      bh0ieSar@ng0la posted a confession in USC Confessions.
          "GIGUBA NA SAD ANG PORTAL!?"

-> posts will only be seen in their respective groups. but yea,
      publicly shared in GLOBAL group.

-> users can also include pictures in a confession also smileys
-> users can also follow a user
